

4x3 Jet Pump

Ideal for dredging and pigging applications

This sturdy, reliable and powerful jet pump is engineered specifically to assist with the removal of rock debris and sediment from the work area. It can be used in decommissioning projects, assisting with flushing and pigging pipelines.

Applications

Removal of sediment and rock debris
Decommissioning

Features

Compact footprint for operations in
tight areas
Emergency shutoff valve

In the box

Operations and maintenance manual
Fuel and oil filters
Drive belts

4x3 Jet Pump

Specifications

Engine specification	Deutz TCD914L06 air-cooled six cylinder turbo diesel engine Rated 174.2hp gross @ 2300rpm
Engine features	IR air starter Manual air intake shutdown Sentinel engine controls High temperature and low oil level shutdown Spark arrestor PEC PTO
Skid features	Welded and galvanised structural steel skid Pull-tested, SEPCo compliant
Skid specifications	209ltr / 46gal aluminium fuel tank Forklift pockets Drip pan 4 point lift
Dimensions	40in x 114in x 63in / 1016mm x 2895mm x 1600mm
Weight	2268kg / 5000lbs
Optional	Venturi air purge valve Extension and suction hose Jetting hose
